Education

Columbia University, *Master's in Data Science*

August 2026 - Dec 2027

- **GPA:** Incoming

University of Rochester, *Bachelor in Information Systems & Economics*

August 2019 - May 2023

Minor in Computer Science

- **GPA:** 3.8/4.0
- **Relevant Coursework:** Advanced Algorithms, Database System, Predictive Analysis, Econometrics

Relevant Experience

Vietnam National University, *Research Assistant*

May 2026 - Present

- Implemented and fine-tuned geospatial deep learning models using PyTorch, benchmarking model performance on Vietnam-scale geospatial datasets against existing baselines.
- Integrated a Geospatial Random Forest (GRF) model into the existing research pipeline and developed Python-based preprocessing workflows for geospatial feature engineering, training, and evaluation.
- **Technologies:** MLflow, PyTorch, GeoPandas, QGIS

Shopee, *Product Operations and Analytics Associate*

June 2025 - May 2026

- Engineered automated data pipelines to consolidate sales and P&L data from multiple sources, reducing manual processing time by 20%.
- Oversaw day-to-day service delivery operations across a regional team of 10+ personnel and BPO partners, driving workflow coordination and performance monitoring to ensure operational efficiency and service quality.
- Analyzed seller behavior and campaign performance to inform promotional strategies, contributing to a 25% YoY growth through data-driven regional decision-making.
- **Technologies:** Python, SQL, Looker, Google Apps Script

Boston Consulting Group (BCG), *Consultant*

Jan - June 2025

- Analyzed customer and survey data to support product launch strategy and feature prioritization for private clients.
- Built pricing and market analysis models to estimate pricing premiums and identify growth opportunities.
- **Technologies:** pandas, SQL, Excel

Peloton, *Business Operations Analyst II*

Dec - June 2024

- Conducted spend analysis for software procurement, uncovering cost-saving opportunities that resulted in \$800K in annual savings and generated \$2M additional revenue opportunities.
- Designed and implemented BI dashboards & reports using pandas and Looker, helping business unit leaders identify \$10M in potential savings.
- **Technologies:** BigQuery, Looker, Coupa, pandas

Samsung Electronics Americas, *Supply Chain Data Ops Analyst*

May - Dec 2023

- Managed procurement operations across 100+ material supply chains by automating purchase order tracking and reporting workflows.
- Boosted analyst productivity by 10%, by optimizing Excel-based reporting tools and automating manual data processing workflows.
- **Technologies:** Python, SQL, SAP

Projects

Housing Prices Competition, *Kaggle Competition*

Rank 403/5425 (Top 8%)

- Built an end-to-end machine learning workflow to predict housing prices, covering data cleaning, feature selection, model training, and batch prediction
- Designed a reusable preprocessing pipeline that handles missing values and categorical variables consistently across training and inference
- **Technologies:** Python, scikit-learn, XGBoost
