Education

Columbia University, *Master's in Data Science*

August 2026 - Dec 2027

- **GPA:** Incoming

University of Rochester, *Bachelor in Information Systems & Economics*

August 2019 - May 2023

Minor in Computer Science

- **GPA:** 3.8/4.0
- **Relevant Coursework:** Advanced Algorithms, Database System, Predictive Analysis, Econometrics

Relevant Experience

Vietnam National University, *Research Assistant*

May 2026 - Present

- Implemented and fine-tuned deep learning models using PyTorch, benchmarking model performance on Vietnam-scale datasets against existing baselines.
- Integrated a Geographical Random Forest model into the existing research pipeline and developed Python-based pre-processing workflows for geospatial feature engineering, training, and evaluation.
- **Technologies:** Python, MLflow, PyTorch, GeoPandas, QGIS

Shopee, *Product Operations and Analytics Associate*

Jun 2025 - May 2026

- Applied statistical analysis to seller performance, campaign effectiveness, and regional sales trends, informing promotional strategies that contributed to over \$100K in revenue and 25% YoY growth.
- Engineered automated data pipelines to consolidate sales and P&L data from multiple sources, reducing manual processing time by 20%.
- Coordinated day-to-day service delivery across a regional team of 10+ internal personnel and BPO partners, overseeing workflow execution and performance monitoring to maintain operational efficiency and service quality.
- **Technologies:** Python, SQL, Looker, Google Apps Script

Boston Consulting Group (BCG), *Consultant*

Jan 2025 - Jun 2025

- Partnered with cross-functional client teams to translate business problems into data-driven analyses, supporting go-to-market strategy for a \$10B infrastructure initiative.
- Developed pricing, market sizing, and financial models to evaluate commercial opportunities and strategy, informing executive-level decision-making.
- **Technologies:** pandas, SQL, Excel

Peloton, *Business Operations Analyst II*

Dec 2023 - Jun 2024

- Led end-to-end procurement initiatives across IT, Professional Services, and CapEx, negotiating supplier terms and applying spend analytics to achieve \$800K in annual savings and identify \$2M in revenue opportunities.
- Designed and implemented BI dashboards using Looker, helping business unit leaders identify \$10M in savings.
- **Technologies:** Python, BigQuery, Looker, Coupa, pandas

Samsung Electronics America, *Supply Chain Data Ops Analyst*

May 2023 - Dec 2023

- Managed procurement operations supporting over \$1M in daily purchasing volume across 100+ global material supply chains, automating purchase order tracking and reporting workflows.
- Increased analyst productivity by 10% by optimizing Excel-based tools and automating data processing workflows.
- **Technologies:** Python, SQL, SAP

■ Projects

Housing Prices Competition, Kaggle Competition

Rank 403/5425 (Top 8%)

- Built an end-to-end machine learning workflow to predict housing prices, covering data cleaning, feature selection, model training, and batch prediction.
- Designed a reusable preprocessing pipeline that handles missing values and categorical variables consistently across training and inference.
- **Technologies:** Python, scikit-learn, XGBoost

Axiom, AI-Powered Reading Tool

July 2026

- Built a macOS application that uses AI to proactively highlight key concepts and provide contextual explanations while users read PDFs.
- Collaborated with a teammate to design, develop, and present the application during OpenAI Build Week, a one-week hackathon.
- **Technologies:** Swift, PDFKit, LLM APIs (Gemini, OpenAI)
