BNP Paribas

Jersey City, NJ

Dear Hiring Manager,

I am excited to apply for the Corporate Functions - Summer Analyst Intern position at BNP Paribas. I am currently pursuing a master's degree in Data Science at Columbia University, where I also serve as a Graduate Teaching Assistant. Combined with my background in business operations, management consulting, and analytics, these experiences have shaped my interest in improving day-to-day processes, supporting stakeholders, and turning analysis into reliable execution.

Most recently, at Shopee, I focused on the growth of a paid seller support program, where sellers paid for dedicated support to improve their performance on the platform. I managed a team of 10 BPO managers supporting the program while also owning marketing campaigns and revenue forecasting. My role was to understand what was driving seller adoption and performance, identify opportunities to grow the program, and translate those insights into campaigns and operating plans. That meant working across the full cycle: analyzing seller and sales data, forecasting revenue, deciding where to focus our marketing efforts, and coordinating with the BPO team to execute those initiatives. Through this work, I helped the program generate more than \$100,000 in annual recurring revenue and achieve 25% year-over-year growth. The experience strengthened my ability to coordinate people and priorities, maintain service quality, and take ownership from planning through execution while balancing growth targets with the practical realities of operating a program day to day.

My broader career has also allowed me to approach these challenges from different perspectives. In operating roles, I learned how clear processes, effective coordination, and consistent follow-through translate into measurable outcomes. At BCG, I gained experience approaching larger, more ambiguous strategic questions and structuring them through rigorous analysis. Now, through my master's in Data Science at Columbia, I am building a deeper technical foundation to complement those experiences. Together, this background has shaped how I approach problems: understanding stakeholder needs, using data to identify opportunities for improvement, and staying close to daily execution to ensure that changes work in practice.

BNP Paribas particularly appeals to me because of its emphasis on high-quality client support and a culture of continuous improvement within Operations. I believe my combination of operational experience, analytical judgment, and team coordination would allow me to contribute effectively to teams tackling the challenge of delivering efficient, accurate, and responsive support across the Bank. I would welcome the opportunity to learn from the Operations team and discuss how my background and approach could contribute to BNP Paribas.

Sincerely,

Morgan Le
