Education

Columbia University, *Master's in Data Science*

August 2026 - Dec 2027

▪ **GPA:** Incoming

University of Rochester, *Bachelor in Information Systems & Economics*

August 2019 - May 2023

Minor in Computer Science **GPA:** 3.8/4.0; Coursework: Advanced Algorithms, Database System, Predictive Analysis, Econometrics

Relevant Experience

Vietnam National University, *Research Assistant*

May 2026 - Present

- Implemented and fine-tuned deep learning models in PyTorch, benchmarking performance on Vietnam-scale datasets against existing baselines.
- Integrated a Geographical Random Forest model into the research pipeline and built Python workflows for geospatial feature engineering, training, and evaluation.

Shopee, *Product Operations and Analytics Associate*

Jun 2025 - May 2026

- Applied statistical analysis to seller performance, campaigns, and regional sales, informing strategies that contributed to over \$100K in revenue and 25% YoY growth.
- Engineered automated pipelines consolidating sales and P&L data from multiple sources, reducing manual processing time by 20%.

Boston Consulting Group (BCG), *Consultant*

Jan 2025 - Jun 2025

- Translated client business problems into data-driven analyses supporting go-to-market strategy for a \$10B infrastructure initiative and executive decision-making.
- Built pricing, market-sizing, and financial models to evaluate commercial opportunities and inform executive decisions.

Peloton, *Business Operations Analyst II*

Dec 2023 - Jun 2024

- Led procurement initiatives that achieved \$800K in annual savings and identified \$2M in revenue opportunities; built dashboards surfacing \$10M in savings.

Samsung Electronics America, *Supply Chain Data Ops Analyst*

May 2023 - Dec 2023

- Managed procurement operations across 100+ global material supply chains and over \$1M in daily purchasing volume, automating tracking and reporting workflows to increase analyst productivity by 10%.

Selected Projects

Axiom, *AI-Powered Reading Tool*

July 2026

- Built the agentic workflow for a macOS AI-powered PDF reading application using the OpenAI Agent SDK and Google ADK, enabling proactive concept highlighting and contextual explanations.
- Collaborated with a teammate to design, develop, and present the application during OpenAI Build Week, a one-week hackathon.

Housing Prices Competition, *Kaggle Competition*

Rank 403/5425 (Top 8%)

- Built an end-to-end ML workflow and reusable preprocessing pipeline for cleaning, feature selection, training, and batch prediction.

Technical Skills

Programming & Data: Python, SQL, C++, pandas, BigQuery, Google Apps Script, Excel

Machine Learning & Engineering: PyTorch, scikit-learn, XGBoost, MLflow, OpenAI Agent SDK, Google ADK, LLM APIs, Git, Docker
