EDUCATION

Columbia University <i>Master's in Data Science</i>	Aug 2026 – Dec 2027
University of Rochester <i>Bachelor in Information Systems & Economics; Minor in Computer Science</i>	Aug 2019 – May 2023
• GPA: 3.8/4.0 • Relevant Coursework: Predictive Analysis, Econometrics, Database System, Advanced Algorithms	

RELEVANT EXPERIENCE

Vietnam National University <i>Research Assistant</i>	Jun 2026 – Aug 2026
• Implemented and fine-tuned PyTorch deep learning models, benchmarking predictive performance on Vietnam-scale datasets against established baselines. • Integrated a Geographical Random Forest model into a research pipeline and built Python preprocessing workflows for geospatial feature engineering, training, and evaluation. • Technologies: Python, MLflow, PyTorch, GeoPandas, QGIS.	
Shopee <i>Product Operations and Analytics Associate</i>	Jun 2025 – Jun 2026
• Analyzed seller performance, campaign effectiveness, and regional sales trends to generate actionable insights for promotional strategies that contributed to over \$100K in revenue and 25% YoY growth. • Engineered automated pipelines that consolidated multi-source sales and P&L data, reducing manual processing time by 20%. • Coordinated day-to-day service delivery across a regional team of 10+ internal personnel and BPO partners, overseeing workflow execution and performance monitoring to maintain operational efficiency and service quality. • Technologies: Python, SQL, Looker, Google Apps Script.	
Boston Consulting Group (BCG) <i>Consultant</i>	Jan 2025 – Jun 2025
• Partnered with cross-functional client teams to translate business problems into data-driven analyses supporting go-to-market strategy for a \$10B infrastructure initiative. • Built pricing, market-sizing, and financial models to evaluate commercial opportunities and inform executive strategy decisions. • Technologies: pandas, SQL, Excel.	
Peloton <i>Business Operations Analyst II</i>	Dec 2023 – Jun 2024
• Applied spend analytics across IT, Professional Services, and CapEx procurement initiatives, negotiating supplier terms to achieve \$800K in annual savings and identify \$2M in revenue opportunities. • Designed and implemented Looker BI dashboards that helped business unit leaders identify \$10M in savings. • Technologies: Python, BigQuery, Looker, Coupa, pandas.	
Samsung Electronics America <i>Supply Chain Data Ops Analyst</i>	May 2023 – Dec 2023
• Automated purchase-order tracking and reporting for procurement operations supporting over \$1M in daily purchasing volume across 100+ global material supply chains. • Increased analyst productivity by 10% by optimizing analytical tools and automating data-processing workflows. • Technologies: Python, SQL, SAP.	

PROJECTS

Housing Prices Competition <i>Kaggle Competition</i>	Rank 403/5425 (Top 8%)
• Built an end-to-end machine learning workflow for housing-price prediction, spanning data cleaning, feature selection, model training, and batch inference. • Built a reusable preprocessing pipeline that handled missing values and categorical features consistently across training and inference. • Technologies: Python, scikit-learn, XGBoost.	
Dwellwise <i>Agent-Ready Apartment Planner</i>	Aug 2026
• Built a full-stack apartment-planning product with dimensioned 2D editing, furniture fit and collision checks, and a synchronized 3D sunlight preview. • Integrated WebMCP tools with validated application commands, revision checks, and human confirmation for destructive agent actions. • Technologies: PostgreSQL, TypeScript, Next.js, React, Three.js, WebMCP.
