EDUCATION

Columbia University

Aug 2026 – Dec 2027

Master's in Data Science

- **Relevant Coursework:** Advanced Algorithms, Statistical Inference & Modelling, Computer Systems

University of Rochester

Aug 2019 – May 2023

Bachelor in Information Systems & Economics; Minor in Computer Science

RELEVANT EXPERIENCE

Vietnam National University

Jun 2026 – Aug 2026

Research Assistant

- Integrated a Geographical Random Forest model into an existing research pipeline and built Python workflows for geospatial feature engineering, training, and evaluation; benchmarked and fine-tuned PyTorch models on Vietnam-scale datasets.
- **Technologies:** Python, PyTorch, MLflow, GeoPandas, QGIS.

Shopee

Jun 2025 – Jun 2026

Product Operations and Analytics Associate

- Analyzed seller performance, campaign effectiveness, and regional sales trends to guide promotional strategies, contributing to over \$100K in revenue and 25% YoY growth.
- Engineered automated data pipelines integrating sales and P&L data across multiple sources, reducing manual processing time by 20%.
- Coordinated service delivery across 10+ internal personnel and BPO partners, managing workflow execution and performance to maintain operational efficiency and service quality.
- **Technologies:** Python, SQL, Looker, Google Apps Script.

Boston Consulting Group (BCG)

Jan 2025 – Jun 2025

Consultant

- Partnered with cross-functional client teams to translate business challenges into data-driven analyses, supporting go-to-market strategy for a \$10B infrastructure initiative.
- Built pricing, market-sizing, and financial models to evaluate commercial opportunities and inform executive decisions.
- **Technologies:** pandas, SQL, Excel.

Peloton

Dec 2023 – Jun 2024

Business Operations Analyst II

- Led end-to-end procurement initiatives across IT, Professional Services, and CapEx, negotiating supplier terms and applying spend analytics to achieve \$800K in annual savings and identify \$2M in revenue opportunities.
- Designed and implemented Looker BI dashboards that helped business unit leaders identify \$10M in savings.
- **Technologies:** Python, BigQuery, Looker, pandas.

Samsung Electronics America

May 2023 – Dec 2023

Supply Chain Data Ops Analyst

- Automated purchase-order tracking and reporting workflows for procurement operations supporting over \$1M in daily purchasing volume across 100+ global material supply chains.
- **Technologies:** Python, SQL, SAP.

PROJECTS

ZephyrAQ | AI-Powered Air Quality Platform

Aug 2026

- Built an AI platform integrating air-quality, weather, traffic, and satellite fire data to investigate Hanoi pollution events and rank likely sources with traceable evidence.
- Developed a FastAPI/PostgreSQL backend and Next.js geospatial dashboard with DataHub context, human review, and auditable investigation histories.
- **Technologies:** Python, FastAPI, PostgreSQL, DataHub, Gemini, Next.js, TypeScript, MapLibre.

Axiom | AI-Powered Reading Tool

Jul 2026

- Collaborated with a teammate to design, develop, and present a macOS application that proactively highlights key concepts and provides contextual explanations while users read PDFs during OpenAI Build Week.
- **Technologies:** Swift, PDFKit, LLM APIs (Gemini, OpenAI).
