EDUCATION

Columbia University <i>Master's in Data Science</i>	Aug 2026 – Dec 2027
University of Rochester <i>Bachelor in Information Systems & Economics; Minor in Computer Science</i>	Aug 2019 – May 2023

RELEVANT EXPERIENCE

Vietnam National University <i>Research Assistant</i> - Implemented and fine-tuned PyTorch deep learning models on Vietnam-scale datasets, benchmarking performance against established baselines. - Integrated a Geographical Random Forest model into an existing research pipeline and built Python preprocessing workflows for geospatial feature engineering, training, and evaluation. Technologies: Python, PyTorch, MLflow.	Jun 2026 – Aug 2026
Shopee <i>Product Operations and Analytics Associate</i> - Analyzed seller performance, campaign effectiveness, and regional sales trends to guide promotional strategies, contributing to over \$100K in revenue and 25% YoY growth. - Engineered automated data pipelines integrating sales and P&L data across multiple sources, reducing manual processing time by 20%. - Coordinated service delivery across 10+ internal personnel and BPO partners, managing workflow execution and performance to maintain operational efficiency and service quality. Technologies: Python, SQL, Looker, Google Apps Script.	Jun 2025 – Jun 2026
Boston Consulting Group (BCG) <i>Consultant</i> - Partnered with cross-functional client teams to translate business challenges into data-driven analyses, supporting go-to-market strategy for a \$10B infrastructure initiative. - Built pricing, market-sizing, and financial models to evaluate commercial opportunities and inform executive decisions. Technologies: pandas, SQL, Excel.	Jan 2025 – Jun 2025
Peloton <i>Business Operations Analyst II</i> - Led end-to-end procurement initiatives across IT, Professional Services, and CapEx, negotiating supplier terms and applying spend analytics to achieve \$800K in annual savings and identify \$2M in revenue opportunities. - Designed and implemented Looker BI dashboards that helped business unit leaders identify \$10M in savings. Technologies: Python, BigQuery, Looker, Coupa, pandas.	Dec 2023 – Jun 2024
Samsung Electronics America <i>Supply Chain Data Ops Analyst</i> - Automated purchase-order tracking and reporting workflows for procurement operations supporting over \$1M in daily purchasing volume across 100+ global material supply chains. - Optimized Excel-based tools and automated data-processing workflows, increasing analyst productivity by 10%. Technologies: Python, SQL, SAP.	May 2023 – Dec 2023

PROJECTS

ZephyrAQ <i>AI-Powered Air Quality Platform</i> - Built an AI-powered platform combining air-quality, weather, traffic, and satellite fire data to investigate Hanoi pollution events and rank likely sources with traceable evidence. - Developed a FastAPI/PostgreSQL backend and Next.js geospatial dashboard with DataHub context, human review, and auditable investigation histories. Technologies: Python, FastAPI, PostgreSQL, DataHub, Gemini, Next.js, TypeScript, MapLibre.	Aug 2026
